Our Values

We believe in bringing together the best resources out there and foster a team of professionals which understands the pestering problems of physician practices and are capable of solving them with untiring commitment.

We're The Best Medical Billing Company

Technology alone cannot resolve all the issues and problems that medical practices face every day. No matter how expensive a practice management tool you are using, you could not realize the best outcomes until it is managed by the experts. American Billing Company works independent of any software dependency and medical technologies. We would manage your billing the way you want. We won't ask you to change any tools that you are currently using to manage your practice. Our experts would simply take control of your existing infrastructure and would optimize it to get the best results.

Most of the medical billing companies impose the upfront cost and try to manage the processes their way. American Billing Company uniquely serves physician practices with customized solutions because we understand that every specialty is different from the other and has totally different requirements. This is why we never extend a same solution to every practice. We analyze the processes and give personalized services to physician practices.

Our Team

Our team includes the best medical professionals and billing experts that are capable of managing any medical practice with technology-enabled outreach around the United States.
